What is Included

- (1) CFC 2.0
Aromatherapy Device
- (1) Water Pipe Adapter
- (1) Cleaning Brush
- (1) Stir Tool
- (1) USB Charger
- (2) Replacement
Mouthpiece Screens
- (1) Instruction Manual

About the Unit

The CFC 2.0 has an improved and amplified design with a revolutionized airflow. The device is ultra discreet, compact, and lightweight making this an ideal device for on the go use. The unit features textured grooves and ridges which provides a stable and comfortable grip while also keeping the device cool. It features a ceramic bowl which can fit up to .5 of ground up herb. Our CFC 2.0 provides a clean and pure taste while also delivering smooth clouds.

The airflow has been boosted to allow for a bigger and smoother draw. Our newest smallest model now comes equipped with a WPA so throwing it on glass water pipe is a breeze. Get denser pure tasting hits with the CFC 2.0.

Key Features

Dimensions

- Length: 131mm
- Width: 32mm
- Depth: 31mm
- Weight: 0.18 lbs
- Material: Plastic

Temperature levels

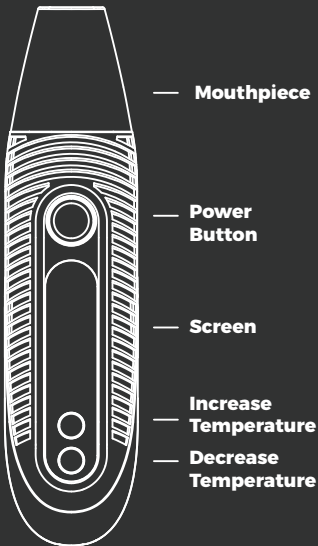

140-446 °F // 60-230 °C

Battery Capacity: (1) 18650 battery

Chamber: Ceramic chamber

- Compact and rugged design with textured grooves for comfortable hand placement.
- Built with medical and food grade material.
- Non combustion aromatherapy device.

What's in a CFC 2.0 aromatherapy device?

How the CFC 2.0 Works

Our versatile CFC 2.0 uses conduction in order to vaporize and extract terpenes. Tug away the mouthpiece to reveal the ceramic bowl. Packing with the CFC 2.0 couldn't be easier, just simply grind down the desired amount of herb. Our ceramic bowl allows for up to .5 of a gram of finely ground herb. Heat up time with the CFC 2.0 is lightning fast as you're able to pull tasty clouds within seconds. Our re-designed mouthpiece has an improved airflow with a heat resistant mouthpiece allowing for a bigger and more comfortable draw.

The CFC 2.0 is truly a versatile unit going from the palm of your hand or directly into a glass water pipe via the water pipe adapter.

How to power the CFC 2.0 on

To power the CFC 2.0 'ON' click the circular button five times in rapid succession. Please note unit will not power up if the clicks are too slow. Once in the 'ON' mode the screen will illuminate and it will automatically heat up to the last previously used temperature.

The unit will stay on for a period of five minutes after which it will go into standby mode. Use the lower temperatures for tasty and flavorful hits or boost up the temperature for more dense and bigger clouds.

Adjusting the Temperature

Using the temperature controls is easy to use on the CFC 2.0. Each click will raise the temperature by one degree. To change the temperature use the buttons located at the opposite back end of the device.

As before each single click will change the temperature, it will decrease the temperature by one degree. Temperature ranges from 140°F-446°F and 60°C-230°C. To switch between Fahrenheit and Celsius click the two bottom buttons at the same time once.

Mouthpiece components

- Mouthpiece tip
- Silicon encasing for mouthpiece screen
- Stainless steel screen

How to Remove Mouthpiece

Pull mouthpiece upwards away from body of device. Once the mouthpiece is removed the white ceramic bowl is clearly visible. Fill the bowl with desired amount of herb and place cap back on. The cap will snap back into place with a little pressure.

Mouthpiece may also be disassembled into the three separate components. Tug outwards on the silicon portion that encases the stainless steel screen. Once the silicon is removed you may also pop out the screen.

How To Load Herb

*Make sure unit is 'OFF' when loading substances.

1. To load unit make sure your herb is finely ground up. This will help ensure it is heated evenly.
2. Do not pack the bowl too tightly or overpack. The CFC 2.0 bowl can hold up to 0.5 grams of finely ground herb.

How to use the Water Pipe Adapter

The WPA (water pipe adapter) is intended to be used for units from the Boundless Technology line. The CFC 2.0 has a specific WPA that can only be used for the CFC 2.0 unit. The adapter is to be used with a glass water pipe as it helps filter the vaporized product. It is designed to fit male and female stems ranging from 10mm-18mm. Using the water pipe adapter not only helps alleviate any irritation caused by the vapor but it also enhances the overall taste of your vaporized product.

- 1.** To use the WPA simply remove the mouthpiece from the CFC 2.0. Once the mouthpiece is removed you can twist on the adapter.
- 2.** To place the WPA on securely snap the WPA into place. The wider base should be the side be snapped onto the CFC 2.0 in place of the mouthpiece.
- 3.** When removing the WPA after use please use extreme caution as the piece does get hot.
- 4.** The WPA can be disassembled for an easier clean.

How to clean the CFC 2.0

Cleaning the unit right after use is key to keeping your CFC 2.0 clean and working properly. The mouthpiece can be disassembled making it easier to maintain.

To clean the mouthpiece you may use isopropyl alcohol, we recommend 91%. If leaving the mouthpiece in isopropyl to soak do not submerge for longer than ten minutes. The screen can be taken off individually for an easy clean. Please be advised only the mouthpiece may be submerged in isopropyl alcohol and NOT the body of the unit. If isopropyl is applied to the body it WILL cause cosmetic damage and this will not be covered by the warranty.

The inside chamber can be cleaned with a cleaning brush. If needed the bottom chamber screen can be removed and cleaned off as well. Please use caution when cleaning the device.

Tips

1. Remove herb from chamber immediately after consuming. This will help keep the bowl clean.
2. Cleaning the unit while still relatively warm makes it easier to remove residue.
3. You may also use coarse salt paired with isopropyl alcohol to help remove residue from the mouthpiece.

Battery and charging

The CFC 2.0 is equipped with one lithium ion 18650 battery which is located right underneath the power 'ON' button.

The unit can also be charged via USB or directly to the wall through a 18650 battery charger.

Charging time for the CFC 2.0 on average is about three hours. On a full charge the CFC 2.0 should last on average 12-14 continuous

sessions at a temperature of 390 Fahrenheit. Please be advised higher temperatures will drain the battery quicker resulting in less sessions.

It is not advised to use the CFC 2.0 while charging or to leave unattended while charging.

Also, to prevent from overheating do not leave the unit charging overnight or on bare carpet/rug.

Notice: Lithium ion batteries are subject to degradation and reduced run time over the course of regular use. While Boundless Technology took great care in selecting premium quality long life lithium ion batteries due to their non-memory features and ability to cycle 300 times preceding degradation battery life will gradually diminish with extended use.

Warranty

3 YEAR LIMITED WARRANTY

Boundless Technology, LLC warrants this CFC 2.0 branded device against defects in materials and workmanship under normal use for a period of three (3) years from the date of retail purchase by the original end-user. The original bill of sale is required to redeem warranty. The limited warranty covers three (3) years for electronics, ceramic heating chamber, structural integrity and attachments. The lithium-ion battery is covered for ninety (90) days. If a physical defect arises and a claim is made within the warranty period, at its option and to extent permitted by law, Boundless Technology will either:

- Exchange the product with another product that is new or

- functionally equivalent to device
- Refund the purchase price of the device if returned within 30 days of the purchase date and if bought directly from our online retail site: bndlstech.com

WARRANTY EXCLUSIONS AND LIMITATIONS

The Limited Warranty applies only to products manufactured by Boundless Technology, LLC, which can be identified by the “Boundless Technology, LLC” trademark, tradename or logo affixed to the device. The Limited Warranty does not apply to any non-Boundless, LLC products. This warranty does not apply to (i) damage caused by accident, abuse, misuse, flood, fire, earthquake, acts of piracy or other external causes; (iii) a device or part

hat has been modified to alter the functionality or capability without the written permission of Boundless technology; (v) cosmetic damage, including but not limited to dents, scratches and/or broken plastic.

This warranty applies to the original end-user and is non-transferrable. Boundless Technology, LLC warranties only apply to devices that are purchased from authorized retailers.

To claim a warranty or questions contact: **info@bndlstech.com** or call **1-866-355-7061**.

SAFETY DISCLAIMERS

Warning

- Failure to follow these safety instructions could result in personal injury or damage. Users of this device do so at their own risk. Neither Boundless Technology, LLC nor its retailers assume any responsibility or liability associated with the use/misuse of the device. Boundless Technology branded products are intended for adult use and consumption only.

Disclaimer

- This device is designed as a mobile solution for the practitioners of aromatherapy. This device is not intended for use with illegal substances.

Choking Hazard

- The CFC 2.0 contains small parts which may be a choking hazard to small children. Keep device away from children.

Handling the CFC 2.0

- Do not drop, deform, bend, crush, puncture, incinerate, microwave, shred, paint, or insert foreign objects into a Boundless CFC 2.0 or try to repair or modify the CFC 2.0 yourself.

- Do not clean the CFC 2.0 other than instructed by Boundless Technology, LLC.

- Do not use a damaged CFC 2.0 charger or non Boundless Technology charger. Incompatible chargers may carry different voltage which may be a fire hazard.

- Use caution when handling the CFC 2.0, the heating chamber is hot. Refrain from direct contact with the main heating chamber when hot. Do not leave the device unattended when it is powered on or while the device is still hot.
- Do not leave in extreme temperatures.

SAFETY FEATURES

Sleep protection

The device is equipped with a safety sleep mode. When the device is powered on and after five minutes of use it will go into sleep mode to avoid over-use. Press and hold the power button for three seconds to resume vaping.
